

Update of the 2021 IECC (IRC Chapter 11) to the 2024 Edition

Development of the 2024 IECC and IRC Chapter 11 will be conducted under International Code Council's (ICC) procedures for standard development – the ANSI approved ICC Consensus Procedures (ICC CP). The IECC will remain an I-Code. The fundamental due process tenets of openness; transparency; balance; consensus; compromise; and a fully deliberative process will be followed.

All meetings (Committee and Subcommittee) are open to all interested parties. All documents will be posted on a dedicated website. A schedule will be developed by staff in consultation with the Chair to ensure the timely production of the 2024 edition. This flowchart is intended to provide a general overview of the key steps in the development process in accordance with the ICC Consensus Procedures.
